 © Sunrise Medical 2024

Please follow this measuring method:

The following method is recommended on the basis of extensive practical experience. Deviations are possible in individual instances.

Seat width (SW):

- a) *For the user:* Allow space between sideguard and hip on each side of the chair
(approx. 10 - 20 mm altogether)
- b) *On the wheelchair:* From outside frame tube to outside frame tube.

Seat depth (SD):

- a) *For the user:* When sitting upright: leave space for 2 - 3 fingers between
front edge of the seat upholstery and back of knee
(approx. 30 - 60 mm). Care must be taken with adj. upholstery.
- b) *On the wheelchair:* From back tube to front of seat upholstery.

Front seat height:

- a) *For the user:* When sitting with 90° kneeangle:
From back of knee to bottom of shoe sole.
- b) *On the wheelchair:* From front of seat tube to the ground .
(min. 30 mm longer than user measurement)
Remember to include the cushion height.

Rear seat height:

- b) *On the wheelchair:* From back of seat tube to the ground.
Note: Max. seat height difference rear to front is 130 mm

Back height:

- a) *For the user:* From the seat, including cushion, to be no more than 10 - 20 mm below the lower shoulder blade.
- b) *On the wheelchair:* From back of seat tube to upper edge of backrest upholstery.
Note: The user's ability to sit upright has a major influence on the back height
and it can therefore differ considerably

Back angle:

Important: The back height depends on the degree of disability.
0° is the angle 90° to the seat. Negative angles are <90°
and positive angles are >90°.

Low Seat Frame vs. High Seat Frame:

The high frame is 40 mm higher than the low frame. So you can choose shorter and lighter forks to minimize the weight of your wheelchair.

Technical Data Overview:

Max. overall height:	950 mm	Max. overall width:	camber	24" rear wheel	25" rear wheel
Max. overall length:	930 mm		For 0° camber:	SW + 170 mm	SW + 170 mm
Max. turning circle:	700 mm		For 2° camber:	SW + 210 mm	SW + 220 mm
Max. safe slope:	7°		For 4° camber:	SW + 260 mm	SW + 270 mm
Wheelchair weight:	from 8,3 kg				
Dismantled weight:	from 5,8 kg				
Weight of heaviest part:	2,1 kg				

All changes in the configuration might change the seat heights.
Manufacturing tolerances are +/- 10 mm for all measurements.

WEIGHT

We want to be very transparent on weight. The following information will be a guide to the lightest possible Krypton F: how to achieve a 8,3 kg folding-wheelchair, and how to order the lightest possible configuration for your Krypton F

Krypton F: 8,3 kg configuration (Transport weight: 5,8 kg)

Frame: high frame, 92°, 10mm inset, seat width: 360 mm, seat depth: 400mm. Seat height: front 470 mm, rear 420 mm.
Axle-stems cut-to-length (KRF010412), CoG Adapter lightweight (KRF070701)

Wheel-lock : lightweight compact wheel-lock

Footrest: Footboard, platform, performance

Backrest: Carbon backrest, EXO superlight, without push-handles

Sideguards: Carbon fibre, slim-style

Rear wheels: 24" Proton wheels with Aluminium handrims (coated or anodized) and Schwalbe One tyres

Forks and casters: 111 mm carbotechnology fork, 3" caster

Please mind that there is a 5% tolerance on all weight specifications due to weight deviations on mounting parts (tyres, caster-wheels etc.)

LIGHTWEIGHT-GUIDE FOR ORDERING THE KRYPTON F

Sunrise Medical offers a wide variety of options for the Krypton F to suit every user's needs. However, most options add significant weight to the wheelchair. To make this more transparent when filling in the order-form, and to assist you in ordering the lightest possible wheelchair, we indicate the approximate weight-increase of the options on the order form:

- (L)** indicates the lightest possible option within the range of options
- (+)** indicates that this option adds more than 500 g to the wheelchair's weight compared to the lightest option within the range

LIGHTWEIGHT OPTIONS FOR THE KRYPTON F

We developed several options for the Krypton F to save weight on the chair without sacrificing daily-use suitability, comfort or durability

Carbon fibre backrest: carbon backrest tubes. Fixed height. (-160 g compared to aluminium backrest)

Axle-stems cut-to-length (KRF010412): specifically cut to your seat-height. Upwards adjustment limited (only +1 cm) (-200 g for rear seat height 430 mm compared to full-length axle-stem)

EXO superlight (KRF030005): lightweight version of the EXO backrest upholstery. EVA-foam padding, adjustable straps, wider cut of the upholstery to cover backrest tubes (-160 g compared to Std. EXO backrest-upholstery)

CoG Adapter, lightweight (KRF070701): (only 0° camber) (-260 g compared to CoG Adapter Standard)

KRF040101 Slim style sideguard

KRF040104 Carbon fibre, cold weather protection, fender

KRF040107 Sideguard, composite, removable (black)

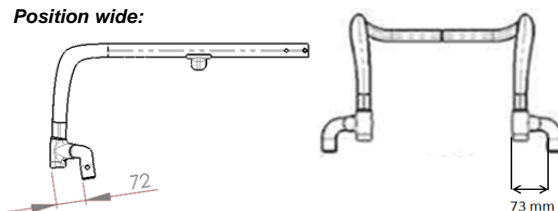

KRF040117 Tubular armrest, swing away, removable, padded

KRF040052 Single-post sideguard, armpad (33 cm)

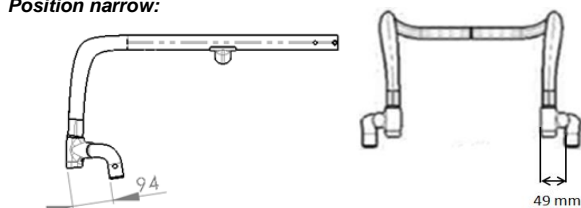

FRAME VERSIONS: CASTOR HOUSE POSITIONS

Position wide:

Further to the front and wider position of the casters for optimized rolling resistance and improved front-stability

Position narrow:

22 mm further rearwards and 24 mm per side more narrow position of the casters for a more narrow front-end and improved manoeuvrability in tight spaces. Reduced front-stability compared to position wide, we recommend this option in combination with seat-height differences (front to rear) of 40mm or

KRF010301 Castor house position wide

KRF010302 Castor house position narrow

Castor house position wide vs. narrow
